

Checklist for Painting Depots

Dear Business Partner

In order to submit you a proposal which meets your (your customer's) requirements, we need as many details as possible in order to submit you a suitable offer.

Here you find some of the most common aspect to be answered:

Useful Information	Comments from ART-STORE to assist you with your
Type of pull-out rack system	If possible, it would be good to pre-define the requested type of painting pull-out rack such as - Aluminium Rails: - Steel Rails: - Linear Rails: - Art Gallery:
Room dimensions	What are the room dimensions for the planned painting pull-out racks? Kindly let us have all the details including lights, ventilations, air-conditioning systems, tubes which could influence the system within the room.
Drawings	Any type of drawing with all the necessary information is helpful/essential. Sectional drawings, top drawings etc., if possible also in DWG.
Type of installation/fixing	What type of installation/fixing would be requested? - freestanding steel construction - directly mounted to the ceiling - suspended from the ceiling with a For more details, please consult our catalogue (page 20/21)
Distance between axis	What is the requested distance between the pull-out racks? This depends on the type of pictures, either modern pictures within frames or pictures with thick frames? As a rule of thumb, 300 mm as the general centre distance is a very common value. The minimum level would be 200 mm. There also can be various distances within a painting depot.
Hanging weight of pictures	Please indicate the requested hanging weight for pictures per m ² . As an average weight we can recommend 10 to 15 kg per m ² . However, also higher weights can be considered. This might increase the pricing as the entire steel construction needs to be adapted accordingly.
Hight of construction/painting walls	Please indicate – if known – the maximum allowed height of the steel construction and/or the desired height of the mesh walls.
Accessories/Options	Any kind of specific requirements for accessories or options? For example: - picture hooks (brochure page 22/23) - additional fixed mesh walls - any other requirements

Delivery and “intransport” of the material from the truck into the depot location	Do you have any specific delivery instructions and the destination to where the equipment should be shipped to? Do you have information about the bringing-in of the equipment into the building/installation room? This is important as if the bringing-in of the material is limited to certain dimensions. Sometimes we have rails, beams or supports whc
Installation	What are the installation/set-up requirements? Would EUN be in charge of the entire installation, or do you need assistance from our side? If yes, what kind of assistance?
Period of project execution	What would be the approx. period when the project would be implemented? Would it be expected within short, mid or long term?
Type of Quotation	What type of quote is requested? - Budgetary quote: This would be the case, that quite some changes are expected. - Firm quote: In this case, we need all the relevant details in order to submit a firm quote.

For any further assistance kindly contact us by phone/e-mail.
